I am writing to apply for the Virtual Data Entry position at Sundayy. I understand the importance of accurate data handling and efficient workflow management in a remote environment.

Through my experience developing full-stack web applications, I have worked extensively with databases such as MySQL, PostgreSQL, and MongoDB. This has given me a strong foundation in data entry, validation, and organization. I am comfortable working with structured data, ensuring accuracy, and maintaining consistency across systems.

I am proficient with tools like Git, Docker, and Linux, which support efficient remote collaboration and system management. I am also experienced in using cloud platforms such as AWS and Google Cloud, which are commonly used in remote work setups.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the Sundayy team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
