I am writing to apply for the Learning Project Manager role at Learnlight. Your focus on putting people first and building meaningful learning experiences resonates with how I approach both technology and teamwork.

While my technical background is in full-stack development, my day-to-day work has always involved project coordination, stakeholder communication, and delivering complex systems on schedule. I have led the development of multi-module platforms, coordinated between clients, designers, and developers, and managed timelines across remote teams.

One project that reflects this is the multivendor e-commerce ecosystem I built using Laravel and Flutter. It required coordinating between customer-facing apps, seller dashboards, delivery agent interfaces, and an admin panel. Managing the integration of role-based access, real-time notifications, and payment flows across multiple platforms taught me how to keep technical delivery aligned with business goals.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and technical background can support Learnlight’s mission.

Sincerely,

Md Shahanur Islam Shagor
