I am writing to apply for the E&C Estimator position at Shermco Industries. The remote nature of this role and the opportunity to contribute to a company with a strong industry reputation caught my attention.

Through my work as a software engineer, I have developed a methodical approach to analyzing requirements, estimating effort, and managing resources. Building full-stack applications from the ground up has taught me to break down complex problems, evaluate trade-offs, and deliver accurate projections under real constraints.

In previous projects, I have been responsible for planning system architecture, estimating development timelines, and coordinating with stakeholders to align technical decisions with business goals. This experience has given me a practical understanding of how to assess scope, identify risks, and communicate clearly with teams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to the Estimator role at Shermco Industries.

Sincerely,

Md Shahanur Islam Shagor
