I am writing to apply for the Photographer position with the UF/IFAS Communications team. The opportunity to create visual content that supports teaching, research, and public engagement across Florida is compelling, and I am confident in my ability to contribute to your strategic digital content efforts.

Through my work in software engineering and computer vision projects, I have developed a strong technical understanding of digital imaging, including camera settings, lighting, and composition. I am proficient with Adobe Photoshop and other digital imaging tools, and I have hands-on experience processing and editing RAW images for various applications.

I have experience organizing and maintaining large-scale digital archives, applying metadata, and managing file storage systems to ensure long-term accessibility. In previous projects, I have worked with image databases, retrieval systems, and asset management workflows, which directly align with the archive and asset management responsibilities of this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and portfolio for your review. I look forward to the possibility of contributing to the UF/IFAS Communications team.

Sincerely,

Md Shahanur Islam Shagor
