I am writing to apply for the (Senior) Manager Network Planning Train - Bau- & Jahresplanung role at Flix. Your work in making rail travel accessible and reliable across Germany is something I find genuinely interesting, and I appreciate the focus on data-driven planning and cross-team collaboration.

Through my professional experience as a full-stack and AI engineer, I have developed strong analytical and technical skills that are directly relevant to this role. I have worked with SQL and Python extensively to build data pipelines, perform analysis, and automate reporting. I am comfortable using BI tools and have integrated AI applications into real-world systems, including training custom AI assistants and processing data for commercial insights.

One area that particularly interests me is the intersection of infrastructure planning and technology. In previous projects, I have designed systems that track real-time metrics, analyze operational data, and generate actionable recommendations. I am confident I can apply this same structured, data-driven approach to evaluating the impact of construction projects on the FlixTrain network and developing alternative concepts.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to discuss how my analytical and technical background can support FlixTrain’s network planning during construction phases. My CV is attached for your review.

Sincerely,

Md Shahanur Islam Shagor
