I am writing to apply for the Senior Sales Manager position at OLIVER Agency. Your model of designing and running bespoke in-house agencies for brands is a genuinely different approach in the marketing services space, and I find the combination of creativity, technology, and client partnership compelling.

My background is in full-stack software engineering and AI, where I have spent years translating complex technical capabilities into clear value propositions for clients and stakeholders. I have worked directly with clients to understand their needs, scope solutions, and deliver results that align with their business goals. This experience has given me a strong foundation in consultative communication and relationship building.

One area that particularly interests me is the emphasis on building pipeline from scratch. I am comfortable operating without an inherited book of accounts and am motivated by the challenge of opening new conversations and winning confidence. I approach problems systematically, stay disciplined with follow-through, and am outcomes-focused by nature.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background could contribute to OLIVER’s growth in the Netherlands and Germany.

Sincerely,

Md Shahanur Islam Shagor
