I am writing to apply for the Kreditorenbuchhalter SAP (m/w/d) position with MY Humancapital GmbH. While my professional background is in software engineering, I bring a strong foundation in structured data management, process optimization, and analytical problem-solving that aligns well with the responsibilities of this role.

Through my work as a Web Developer, I have developed a meticulous approach to handling data. I have worked extensively with relational databases like MySQL and PostgreSQL, where accuracy, consistency, and attention to detail are critical. This experience has given me the discipline to manage large volumes of financial data, perform reconciliations, and ensure data integrity.

One area that particularly interests me is the opportunity to apply my structured workflow and process-oriented mindset to accounts payable tasks. My experience in building and maintaining complex systems has taught me to follow procedures precisely, meet deadlines, and maintain high data quality standards. I am confident in my ability to learn SAP and contribute to efficient invoice processing and vendor management.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
