I am writing to apply for the Technischer Projektmanager position at MY Humancapital GmbH. Your focus on technical training and learning solutions for an engineering-driven partner company in Munich aligns with my background in software engineering and project coordination.

Through my professional experience as a Web Developer, I have managed full-stack development projects from initial concept through deployment. This involved creating project plans, coordinating with internal teams and external clients, conducting reviews and testing, and ensuring deliverables met technical and quality standards. I am comfortable taking ownership of sub-projects and guiding them through the full lifecycle.

One area that particularly interests me is the development of digital learning media and training programs. In my previous roles, I have designed and documented technical systems, created user-facing guides, and built interactive interfaces that simplify complex concepts. I understand the importance of clear, didactic content and structured workflows when delivering technical training solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and technical background can contribute to your team.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
