I am writing to apply for the Projektassistenz position in Heilbronn. Your description of a role that combines organizational coordination, data management, and event support aligns with my experience in structured project environments.

In my professional experience as a Web Developer, I was responsible for coordinating tasks across teams, managing project documentation, and ensuring that information flowed smoothly between internal and external stakeholders. I regularly maintained data systems, prepared reports, and supported the planning and follow-up of meetings and presentations.

One area that particularly interests me is the emphasis on administrative precision and reliable documentation. In my previous roles, I handled data entry, maintained high-quality records, and created reports and presentations that supported decision-making. I am comfortable working with tools like Excel, PowerPoint, and Word, and I adapt quickly to new administrative systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am organized, detail-oriented, and used to supporting teams in structured environments. I would welcome the opportunity to contribute to your partner company's project operations in Heilbronn. I have attached my CV for your review and look forward to hearing from you.

Sincerely,

Md Shahanur Islam Shagor
