I am writing to apply for the Sachbearbeiter Logistik & Materialdisposition position at MY Humancapital GmbH's partner company in Munich. The role's focus on coordinating material flow, supporting spare parts supply, and contributing to cross-departmental projects aligns with my experience in managing complex workflows and collaborating across teams.

Through my work as a software engineer, I have developed strong project coordination and problem-solving skills. I have experience acting as a bridge between different teams, ensuring that tasks are completed on schedule and that communication remains clear and effective. This background has given me a structured approach to managing logistics-related challenges and supporting operational goals.

In previous professional experience, I coordinated with production, logistics, and development teams to streamline processes and improve efficiency. I am comfortable taking ownership of tasks, working independently, and adapting to changing priorities. My ability to analyze problems and implement practical solutions has been a consistent strength across projects.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
