I am writing to apply for the Kreditsachbearbeiter (m/w/d) position at MY Humancapital GmbH in Munich. While my professional background is in software engineering, I bring strong analytical thinking, process discipline, and data management capabilities that align well with the responsibilities of this role.

Through my experience as a Web Developer, I have built and maintained systems that handle complex data workflows, enforce data integrity, and support accurate documentation. I am accustomed to working with structured data, managing records, and ensuring that every detail is correctly captured and stored. These skills are directly applicable to the careful handling of credit engagements, loan disbursements, and collateral documentation.

One area that particularly interests me is the emphasis on process optimization and maintaining high data quality. In my development work, I have consistently focused on improving system efficiency, reducing errors, and creating reliable workflows. I am confident that this mindset will allow me to contribute effectively to the follow-up and portfolio management tasks described in the job description.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application, and I look forward to the opportunity to discuss how my skills can support your team in Munich.

Sincerely,

Md Shahanur Islam Shagor
