I am writing to apply for the Care Specialist position at Mixlab. Your company's focus on veterinary compounding pharmacy and remote care delivery is an area where I see strong alignment with my background in building reliable, user-focused systems and working effectively in distributed team environments.

Through my professional experience as a web developer, I have developed strong skills in communication, problem-solving, and managing workflows independently. I am comfortable working remotely, coordinating with team members across different time zones, and ensuring that tasks are completed accurately and on time.

One area that particularly interests me is the opportunity to support customers and internal teams with clear, efficient communication. In my previous roles, I have worked closely with stakeholders to understand requirements, troubleshoot issues, and deliver solutions that meet real-world needs. I bring the same attention to detail and reliability to every interaction.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
