I am writing to apply for the Medical Administrative Assistant role at CuraSenseAI. The opportunity to apply my organizational and technical skills in a healthcare-focused environment is something I find genuinely interesting.

Through my work as a software engineer, I have developed a strong ability to create, review, and manage structured information with precision. Building full-stack applications has required me to maintain clean documentation, ensure data accuracy, and communicate complex details clearly to both technical and non-technical audiences.

In previous projects, I have been responsible for designing systems that handle large volumes of data, automate repetitive tasks, and maintain high standards of quality. These experiences have given me a practical understanding of how to organize information, follow structured workflows, and deliver consistent results under deadlines.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background aligns with the needs of your team.

Sincerely,

Md Shahanur Islam Shagor
