I am writing to apply for the Chief of Staff GM Advertising role at Instacart. What stands out to me about this opportunity is the chance to bring operational discipline and structured thinking to a fast-scaling advertising business that sits at the center of Instacart's growth.

My background is in software engineering and full-stack development, where I have spent years building systems that require clear priorities, cross-functional coordination, and reliable execution. In my professional experience, I have worked directly with senior leadership to align technical roadmaps with business objectives, manage competing workstreams, and ensure that complex initiatives land on time and within scope.

One area that particularly interests me is the operating rhythm described in this role. In previous work, I have designed team cadences, prepared executive-ready briefings, and tracked deliverables across multiple teams. I am comfortable taking ambiguous challenges and structuring them into clear, actionable plans that keep stakeholders aligned and moving forward.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my operational discipline and analytical approach can support the GM and the broader Ads organization.

Sincerely,

Md Shahanur Islam Shagor
