I am writing to apply for the Implementation Project Manager role at Intellum. The opportunity to guide customers through complex technical implementations and platform launches aligns well with my experience in delivering end-to-end projects and collaborating across teams.

Through my professional experience as a Web Developer, I have managed full-stack application delivery from kickoff through deployment. I have worked closely with stakeholders to define requirements, track progress, and ensure milestones are met on time. This has given me a practical understanding of how to align technical execution with business outcomes while maintaining clear communication with both internal teams and clients.

One area that particularly interests me is the client-facing nature of this role. I have experience coordinating resources across engineering, product, and customer teams to drive successful project delivery. I am comfortable identifying risks early, resolving issues proactively, and providing clear technical guidance throughout the project lifecycle.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
