I am writing to apply for the Medical Secretary role at CuraSenseAI. The opportunity to contribute my organizational and technical skills to a team focused on structured, high-quality work is something I find genuinely interesting.

Through my professional experience as a Web Developer, I have developed a disciplined approach to creating and maintaining structured systems. I have worked extensively with databases, APIs, and documentation, ensuring that information is accurate, well-organized, and easily accessible. This background has given me strong attention to detail and the ability to handle complex workflows with precision.

One area that particularly interests me is the emphasis on creating and reviewing structured content. In my previous roles, I was responsible for building systems that required clear data entry, verification processes, and consistent formatting. I am comfortable working with detailed information, maintaining records, and ensuring that outputs meet quality standards.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my background can support the work at CuraSenseAI.

Sincerely,

Md Shahanur Islam Shagor
