I am writing to apply for the Learning & Development Specialist role at HealthCorps. Your mission to improve health outcomes through near-peer mentorship and community-based programming is impactful, and I am drawn to the opportunity to shape the training experience for college mentors who deliver this work.

Although my professional background is in software engineering, I have spent years building practical training resources, documentation, and onboarding materials for technical teams. In my previous roles, I developed how-to guides, quick-reference sheets, and video-based tutorials that helped developers and stakeholders quickly understand complex systems. I know how to translate detailed information into clear, actionable content that people can actually use.

What stands out to me about this role is the emphasis on meeting college-aged mentors where they are. I understand that today's young adults learn differently through short videos, push notifications, interactive modules, and text-based tips. I am comfortable experimenting with new formats and staying current with what engages this generation. I am also tech-savvy and quick to pick up new platforms, including learning management systems and design tools.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
