I am writing to apply for the Learning & Development Specialist role at HealthCorps. Your mission to improve health outcomes through near-peer mentorship and community-based programming is meaningful work, and I am drawn to the opportunity to shape how college mentors are trained and supported.

Through my experience as a software engineer, I have developed strong skills in creating clear, practical training resources and documentation. I have built onboarding systems, how-to guides, and video-based tutorials for technical teams, ensuring new members can quickly understand complex workflows and tools. I am comfortable with learning management systems, video editing, and design tools, and I pick up new platforms quickly.

One area that particularly interests me is designing training that meets young adults where they are. I have worked with college-aged teammates and interns across multiple countries, and I understand the importance of creating content that is concise, engaging, and accessible. I am skilled at giving honest, supportive feedback and coaching others to improve without undermining their confidence.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident I can contribute to HealthCorps' mentor training and development efforts, and I would welcome the chance to discuss how my background aligns with your needs. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
