I am writing to apply for the Learning & Development Specialist role at HealthCorps. Your mission to improve health outcomes through near-peer mentorship and community-based programming is impactful, and I am drawn to the opportunity to shape the mentor experience that makes that work possible.

Although my professional background is in software engineering, I have spent years designing training materials, documentation, and onboarding resources for technical teams. At Explo-IT and DataSoft LTD, I created how-to guides, quick-reference sheets, and workflow templates that helped new developers ramp up quickly. I also led informal coaching sessions and code reviews, which taught me how to give feedback that is honest, supportive, and actionable.

What stands out to me about this role is the emphasis on meeting college-aged mentors where they are. I understand that short videos, interactive modules, and text-based tips are more effective than long manuals for this generation. I am comfortable creating video content, using design tools, and experimenting with new formats to keep training engaging and practical.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in training design and coaching can support HealthCorps' mission.

Sincerely,

Md Shahanur Islam Shagor
