I am writing to apply for the test position at Doctor's Recruiter.com. My experience as a full-stack developer aligns well with the technical requirements of this role.

Over the past four years, I have built and deployed web applications using Laravel, Next.js, React, and Node.js. My work includes designing RESTful APIs, implementing authentication and role-based access control, and integrating payment gateways. I also have experience with MySQL, PostgreSQL, and Redis for database optimization and caching.

In my professional experience at Explo-IT, I delivered scalable web applications from concept to deployment. I built responsive, SEO-friendly interfaces with Next.js and Tailwind CSS, implemented real-time features using WebSockets, and maintained production systems on Linux servers with Docker and Nginx. I also set up CI/CD pipelines and managed cloud deployments on AWS.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
