I am writing to apply for the Customer Experience Manager role at empact. Your mission to build a decentralized energy provider for the building sector and drive the transition to a climate-neutral future is both timely and meaningful. I share your commitment to sustainability and would welcome the opportunity to contribute to your customer-facing operations.

While my background is primarily in software engineering, I have spent years working directly with clients and end-users in a technical context. In my role as a Web Developer at Explo-IT, I was responsible for onboarding new clients, explaining product features clearly, and ensuring a smooth handoff from sales to ongoing support. I handled inquiries across email and chat, maintained accurate customer records, and collaborated closely with project management and development teams to resolve issues quickly.

One area that particularly interests me is the emphasis on structured onboarding and transparent communication in this role. I have experience creating documentation and walkthroughs that help non-technical users understand complex systems. I am comfortable managing multiple accounts simultaneously and maintaining a high standard of service quality, even under pressure.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my customer-oriented mindset and technical background can support empact’s growth and service excellence.

Sincerely,

Md Shahanur Islam Shagor
