I am writing to apply for the Customer Success Manager Senior position at Orquest. Your mission to synchronize in-store experiences through AI and machine learning resonates with my own interest in building intelligent systems that solve real-world operational challenges.

Although my professional background is in software engineering, I have consistently worked in roles that required strong client engagement, product adoption, and cross-functional coordination. At Explo-IT, I collaborated directly with stakeholders to understand their needs, delivered tailored solutions, and ensured smooth adoption of new features. This experience has given me a practical understanding of how to drive value for customers and maintain long-term relationships.

I am comfortable working with data to identify trends and improvement opportunities. My technical background allows me to translate complex product capabilities into clear, actionable insights for both operational teams and executive stakeholders. I am also experienced in coordinating with sales, product, and support teams to unblock issues and relay customer feedback effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
