I am writing to apply for the Civil Engineer EN 8.42 position at Credence. Your work supporting the Engineering Directorate at Wright-Patterson Air Force Base and delivering mission-critical solutions to defense and health federal organizations is impressive. I am interested in contributing to your team's project management and technical documentation efforts.

My background is in software engineering, where I have spent over four years building full-stack applications and managing complex technical projects. Through my professional experience, I have developed strong skills in creating and reviewing technical documentation, including system specifications, API documentation, and project reports. I am accustomed to working within structured workflows that require precision, clarity, and coordination across multiple teams.

One area that particularly interests me is the responsibility for developing and reviewing Statements of Work (SOW), Performance Work Statements (PWS), and project documentation. In my previous roles, I regularly prepared technical analyses, cost estimates, and project schedules for web application delivery. I have experience participating in design reviews, coordinating with stakeholders, and ensuring that project documentation meets quality standards before submission.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am comfortable supporting project meetings, site visits, and quality assurance activities as part of a coordinated team effort.

I have attached my CV for your review and would welcome the opportunity to discuss how my project coordination and documentation experience can support the Engineering Directorate's mission. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
