I am writing to apply for the Program Manager, Fulfillment Operations role at SupplyHouse.com. Your focus on facility buildout and automation initiatives across the fulfillment network aligns with my experience in managing complex technical projects from planning through deployment.

SupplyHouse.com's position as an e-commerce leader in HVAC, plumbing, and electrical supplies since 2004 is impressive. What stands out to me is the emphasis on innovation and teamwork, values that match how I approach project delivery.

Through my professional experience, I have led end-to-end project execution for web applications, coordinating with operations, IT, and external stakeholders to deliver on scope, schedule, and budget. I have deployed automation systems using Docker, CI/CD pipelines, and cloud infrastructure, ensuring reliable and scalable deployments.

A relevant example is my work on a real-time server health monitoring dashboard. I built the system using Node.js, Socket.IO, and Docker, coordinating with team members to stream live metrics and ensure system reliability. This required close collaboration across technical and operational teams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and automation experience can contribute to SupplyHouse.com's fulfillment operations.

Sincerely,

Md Shahanur Islam Shagor
