I am writing to express my interest in the sdf position at Women Builders Council. The opportunity to contribute to your team remotely aligns well with my experience in full-stack development and AI engineering.

My technical background centers on building scalable web applications using Laravel, Next.js, React, and Node.js. I have worked extensively with RESTful APIs, MySQL, and PostgreSQL, and have implemented authentication systems, role-based access control, and payment gateway integrations. I also have hands-on experience with Docker, Nginx, and CI/CD pipelines for deployment.

In previous professional roles, I designed and developed full-stack applications that required real-time features, database optimization, and responsive, SEO-friendly interfaces. I have delivered projects using Laravel for backend logic and Next.js for modern frontend architecture, ensuring clean separation of concerns and maintainable code.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Women Builders Council.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
