I am writing to apply for the asdffd position at Women Builders Council. I have been following your organization’s work and am interested in contributing to your team.

My professional experience centers on full-stack web development. Over the past four years, I have worked with Laravel and Next.js to build production applications that handle authentication, database management, and API integration. I am comfortable working across the entire stack, from designing database schemas in MySQL and PostgreSQL to building responsive interfaces with Tailwind CSS and React.

In previous roles, I have delivered features such as real-time notifications using WebSockets, payment gateway integration, role-based access control, and server deployment on Linux environments with Nginx and Docker. I also have experience optimizing application performance through query tuning and caching strategies.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background aligns with the needs of your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
