I am writing to apply for the Social Media & Design Manager:in position at MINT-Zentrum Hirschaid gGmbH. What stands out to me about this role is the emphasis on authentic storytelling and visual communication rather than generic marketing. The opportunity to make visible what young people learn, create, and experience aligns with my own approach to building meaningful digital experiences.

Through my work as a full-stack developer, I have developed a strong sense of visual design and user experience. I regularly use Figma for interface design and prototyping, and I have built responsive, brand-consistent UIs using Tailwind CSS and Bootstrap across multiple projects. I understand how typography, color, layout, and visual hierarchy shape how people perceive and engage with content.

One area that particularly interests me is the balance between content creation and graphic design. In previous projects, I have prepared visual materials for websites, newsletters, and presentations, ensuring consistency with brand identity. I am comfortable working with design tools and have experience producing content that is both professional and visually engaging.

In addition to my technical and design experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to your team and help tell the story of MINT-Zentrum Hirschaid.

Sincerely,

Md Shahanur Islam Shagor
