I am writing to apply for the Senior Enterprise Account Executive - DACH position at Tulip Interfaces. Tulip's mission to transform frontline operations through an AI-native, no-code platform is compelling, and I am drawn to the opportunity to help scale commercial presence across the DACH region.

My background is in software engineering, where I have spent over four years building full-stack web applications and working directly with stakeholders to understand business requirements and deliver technical solutions. This experience has given me a strong ability to translate complex technical capabilities into clear, value-driven conversations with non-technical audiences.

In my previous role at Explo-IT, I collaborated closely with cross-functional teams including engineering, product, and business stakeholders to scope features, demo applications, and drive project delivery. I am comfortable operating with autonomy, building processes from scratch, and contributing to strategic planning from a technical perspective.

One area that particularly interests me is the opportunity to help shape Tulip's go-to-market strategy in the DACH region. I am fluent in English and have working knowledge of German, and I am eager to apply my communication skills and technical understanding to build strong relationships with customers and partners.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Tulip's growth in the DACH region.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
