I am writing to apply for the Steuerberater (m/w/d) position at Taxtalente.de for a partner firm in Magstadt. While my professional background is in software engineering, I bring a strong orientation toward digital workflows, data accuracy, and process optimization that aligns with the modern, digital-first environment your partner firm offers.

Through my experience as a Web Developer, I have built and maintained scalable web applications using Laravel, Next.js, and MySQL. I have implemented role-based access control, secure authentication systems, and payment integrations. These projects required careful attention to data integrity, structured reporting, and reliable system performance.

One area that particularly interests me is the opportunity to work with digital processes and modern tools in a tax advisory context. I am comfortable adapting to new domains and have a track record of quickly learning industry-specific requirements. My work with real-time features, database optimization, and API development has given me a methodical approach to problem-solving and quality assurance.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills could contribute to your partner firm in Magstadt.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
