I am writing to apply for the Copywriting Lead Freelance role at eStoreLabs. Your focus on data-driven eCommerce and performance-based strategies for global enterprises is something I find genuinely interesting. The opportunity to lead copywriting workflows across multiple languages aligns well with my communication experience.

Although my primary expertise is in software engineering, I have consistently worked in environments that demand clear, precise, and audience-aware written communication. In my previous roles, I was responsible for documenting technical systems, writing API specifications, and communicating project requirements directly with international clients. This required me to review source materials, extract key information, and produce structured summaries that different stakeholders could act on.

The responsibilities outlined in this role reviewing English source articles, creating copywriting briefs, providing keywords for SEO, and checking deliverables are tasks I am well prepared for. My experience with multilingual projects and direct client communication means I can manage the full workflow from brief creation to quality assurance without constant supervision.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am available for the required 90+ hours in July and August and can commit to working during standard business hours. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to eStoreLabs.

Sincerely,

Md Shahanur Islam Shagor
