I am writing to apply for the Skilled Handyman position at Red Deer Polytechnic. While my professional experience is in software engineering, I have always enjoyed working with my hands, fixing things, and solving practical problems. I am looking for an opportunity to apply my reliability, problem-solving mindset, and strong work ethic to a hands-on trade role.

I am a quick learner who takes pride in doing a job well. I have experience with general home repairs, basic tool use, and maintenance tasks from personal projects and helping friends and family. I am comfortable with carpentry, painting, drywall patching, minor plumbing, and electrical work.

I have my own truck suitable for transporting tools and materials, a full set of basic hand and power tools, a smartphone with reliable internet, and a valid driver's license. I am comfortable using field apps and dispatching software. I am available for flexible scheduling, including standard hours and occasional adjustments as needed.

In addition to my technical skills, I communicate clearly with customers and team members. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in diverse environments. I am reliable, show up on time, and treat every job with respect.

I am eager to grow my skills in the trades and contribute to Handyman Connection's reputation for quality work. I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
