I am writing to apply for the BlueYonder Professionals position at Covetus. With a strong foundation in software engineering and a track record of delivering full-stack applications, I am well positioned to contribute to your team.

My professional experience spans modern programming languages and frameworks including Laravel, Next.js, React, Node.js, and TypeScript. I have worked extensively with the software development life cycle and agile methodologies, delivering production-ready systems that balance performance, scalability, and maintainability.

A key area of my work involves analyzing and optimizing system performance. In previous roles, I have tuned database queries, implemented caching strategies, and optimized application response times. I have also built and integrated RESTful APIs, implemented secure authentication flows, and deployed applications on Linux servers with Docker and CI/CD pipelines.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my background aligns with the needs of your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
