I am writing to apply for the Healthcare Admin Assistant AI Projects role at CuraSenseAI. The opportunity to apply my technical skills toward improving healthcare administrative workflows through AI is something I find genuinely interesting.

Through my project work, I have built AI-powered systems that handle structured data, automate repetitive tasks, and deliver intelligent assistance. I developed an AI-powered financial application where I integrated OpenAI assistants, voice-to-text transcription via AWS Transcribe, and automated PDF generation. This required careful handling of user data, API orchestration, and real-time processing.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my skills can contribute to the AI projects at CuraSenseAI.

Sincerely,

Md Shahanur Islam Shagor
