I am writing to apply for the Project Assistant role at Exactus Energy. Your focus on forward-thinking environmental solutions aligns with my interest in building practical systems that support real-world impact.

Through my professional experience as a Web Developer, I have developed strong project coordination skills while delivering full-stack applications from concept to deployment. I have worked closely with stakeholders to define requirements, manage timelines, and ensure smooth communication between technical and non-technical team members. This has given me a practical understanding of how to keep projects organized, transparent, and on track.

One area that particularly interests me is the intersection of technology and sustainability. In previous work, I have managed complex workflows involving API integrations, database optimization, and third-party service coordination. These experiences have taught me to prioritize tasks, document processes clearly, and adapt quickly when priorities shift.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can support Exactus Energy’s mission.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
