I am writing to apply for the Maintenance Contract & Billing Specialist position at EDL. Your company's role as a leading provider of AI-powered radiology and imaging solutions is impressive, and I am interested in contributing to your continued growth in Germany.

In my previous roles as a web developer, I was responsible for managing the full lifecycle of software projects, from initial requirements gathering to deployment and maintenance. This required meticulous attention to detail, accurate data management, and strict adherence to project timelines and specifications. I am confident these skills translate directly to managing maintenance and software support contracts.

A key part of my work involved acting as a primary point of contact for clients, coordinating with internal teams like sales and support, and ensuring that all deliverables met contractual terms. I am comfortable preparing reports, tracking progress, and contributing to process improvements to enhance efficiency and compliance.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my organizational skills and attention to detail can benefit EDL.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
