I am writing to apply for the Partner Success Specialist Central European Market position at Playtomic. As the world's largest racket sports platform, Playtomic is transforming how players connect and clubs operate, and I am keen to contribute to this mission in the German market.

Although my professional background is in software engineering, I have developed strong client-facing and operational skills through years of cross-functional collaboration. In my role as a Web Developer, I worked directly with stakeholders to understand their needs, communicate technical solutions clearly, and ensure timely delivery. This experience has made me comfortable with business reviews, proactive communication, and building long-term relationships.

I am a data-driven problem solver. In previous projects, I regularly analyzed performance metrics, identified bottlenecks, and implemented improvements. I am proficient with Excel and Google Sheets and can quickly adapt to tools like HubSpot. My ability to break down complex information and present actionable insights will help me support partner clubs effectively.

I am fluent in English and have working knowledge of German. I am based in Germany and fully prepared to travel up to 15% for face-to-face meetings. As a racket sports enthusiast with knowledge of the padel industry, I understand the culture and needs of sports clubs. I am organized, detail-oriented, and comfortable working in a high-growth environment.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills in communication, analysis, and relationship management can contribute to Playtomic's growth in the Central European market.

Sincerely,

Md Shahanur Islam Shagor
