I am writing to apply for the Projektleiter im Bereich Kabelleitungsbau position at ONT Oberhausener Nachrichtentechnik GmbH. Your company's focus on communication technology and system integration across telecommunications, energy, and industrial sectors aligns with my technical background and project management experience.

While my core expertise is in software engineering and system architecture, I have consistently taken on project leadership responsibilities in my professional work. Over the past four years, I have planned, coordinated, and delivered full-stack web applications and integrated systems, managing timelines, resources, and cross-functional communication from concept to deployment.

One area that particularly interests me is the coordination of complex technical projects involving multiple stakeholders and subcontractors. In my previous roles, I acted as the primary technical contact for clients, managed development workflows, ensured quality and deadline compliance, and maintained clear documentation throughout the project lifecycle. These responsibilities closely mirror the project steering, resource planning, and subcontractor coordination described in your job posting.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and technical background can contribute to ONT's continued success.

Sincerely,

Md Shahanur Islam Shagor
