I am writing to apply for the Performance Marketing Manager Amazon (m/w/d) position at BonaTea GmbH. Your journey from a shared apartment in 2021 to becoming a top seller on Amazon is impressive, and I would welcome the opportunity to contribute to your next growth phase.

Although my professional background is in software engineering, I bring a strong analytical and data-driven approach that directly supports the responsibilities of this role. My work building full-stack web applications has required me to constantly analyze performance metrics, optimize system efficiency, and make decisions based on quantitative data. I am comfortable working with numbers, identifying patterns, and translating insights into actionable improvements.

In previous work, I have developed and maintained complex systems involving user authentication, payment integrations, and real-time data processing. These projects demanded structured, data-driven thinking and the ability to optimize for performance under real-world conditions. I am confident that this analytical discipline will transfer well to managing and optimizing Amazon Ads campaigns, analyzing KPIs, and driving measurable results.

BonaTea's emphasis on direct results, ownership, and creative problem-solving resonates with how I prefer to work. I enjoy taking initiative, learning quickly, and seeing the tangible impact of my efforts. I am eager to learn Amazon Ads from your team and grow into a performance marketing professional.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my analytical skills and eagerness to learn can contribute to BonaTea's continued success.

Sincerely,

Md Shahanur Islam Shagor
