I am writing to apply for the Administrative Assistant position at Aramco. Your description of an organized, dependable, and people-focused professional who supports daily operations and creates a positive environment aligns with how I approach my work.

While my background is in software engineering, the core of my daily work has always been administrative in nature. Over the past four years, I have managed project timelines, coordinated with multiple stakeholders, maintained detailed documentation, scheduled meetings, and ensured that communication between technical and non-technical team members remained clear and efficient. These responsibilities have given me strong organizational habits and a practical understanding of what it takes to keep operations running smoothly.

A relevant example is my work on the Travel Agency App project, where I coordinated frontend and backend development, managed task priorities across the team, maintained project documentation, and communicated directly with the client to ensure requirements were met on schedule. This required careful calendar management, clear reporting, and consistent follow-through on action items.

In addition to my organizational experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
