I am writing to apply for the SEO Content Writer role at Inspira Education. Your mission to democratize access to high-quality coaching and your work across Inspira Advantage, Quad Education, and Juris Education is genuinely interesting. I appreciate how you combine software, services, and content to create equal opportunities for students worldwide.

Although my primary expertise is in software engineering, I have consistently worked at the intersection of technology and content. Over the past four years, I have built full-stack web applications where I was responsible not only for development but also for crafting clear, user-facing content. This included writing SEO-optimized landing pages, product descriptions, help documentation, and marketing copy for platforms in travel, real estate, and finance.

One area where I have direct experience is creating content that performs well in both traditional search engines and generative AI platforms. While developing the Travel Agency App and the AI-powered Real Estate platform, I wrote structured content that improved discoverability and user engagement. I also worked closely with subject matter experts and stakeholders to ensure accuracy and brand consistency across all written materials.

In addition to my technical and content experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
