I am writing to apply for the Logistics & Operations Assistant role at Valatam. Your mission to connect bilingual professionals across Latin America with meaningful remote opportunities is something I find genuinely valuable, and I would welcome the chance to contribute to your operational team.

While my technical background is in software engineering, I have developed strong organizational and coordination skills through managing end-to-end project workflows, maintaining deployment pipelines, and ensuring smooth communication between development teams and stakeholders. These experiences have given me a practical understanding of how operations, logistics, and technical execution need to work together.

In my previous roles, I was responsible for tracking project timelines, managing task priorities, documenting processes clearly, and supporting cross-team coordination. I am comfortable working with data, maintaining records, and using tools that help streamline operations. I also have hands-on experience with cloud platforms, databases, and monitoring systems that are useful for operational reporting and process optimization.

In addition to my technical and operational experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application, and I look forward to the possibility of contributing to Valatam’s operations team.

Sincerely,

Md Shahanur Islam Shagor
