I am writing to express my interest in the Online Volunteer assignment for monitoring news coverage with a focus on migration at IOM Venezuela. This role directly supports informed decision-making and strategic communication in a field that has real impact on people's lives.

Through my work in software engineering, I have developed strong skills in data analysis, information verification, and producing clear, structured summaries. I am comfortable working with keyword-based classification methodologies and digital monitoring tools to identify relevant trends and narratives.

One area that particularly interests me is the daily monitoring of national, regional, and international media and social networks. I understand the importance of identifying critical topics related to mobility, protection risks, and organizational visibility. My experience building systems that process and organize large volumes of information makes me well-suited to deliver the daily bulletin and immediate alerts required for this assignment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am disciplined about delivering outputs on time and working in a coordinated manner with a remote team. I would welcome the opportunity to contribute to IOM's mission in Venezuela and support your communication and risk management efforts.

I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
