I am writing to apply for the Strategic Partnerships Director position at peopleworth. The opportunity to lead strategic partner relationships and drive operational excellence within a people-centred performance culture aligns well with my professional approach.

While my technical background is in software engineering, my work has consistently involved managing complex stakeholder relationships, coordinating cross-functional teams, and ensuring delivery commitments are met. In my role as a Web Developer, I collaborated directly with stakeholders and engineering teammates to align project objectives with business outcomes, resolve escalated issues, and maintain clear communication across distributed teams.

One area that particularly interests me is the focus on governance, reporting, and risk management within partnership engagements. In previous projects, I prepared performance updates, coordinated delivery activities across multiple contributors, and developed processes to improve operational efficiency. These experiences have given me a practical understanding of how to balance strategic objectives with day-to-day execution.

In addition to my professional experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in stakeholder coordination and project delivery can contribute to the success of your partnership initiatives. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
