I am writing to apply for the Medical Claims Support I position at Moda Health. Your company's long-standing commitment to quality healthcare and community support in Oregon since 1955 is impressive, and I would welcome the opportunity to contribute to your team.

While my professional background is in software engineering, the analytical and detail-oriented nature of this role aligns well with my strengths. In my work developing web applications, I regularly analyzed complex data, identified discrepancies, and ensured accuracy in every component. I am accustomed to reviewing policies and procedures to maintain quality standards, much like the claims processing work described in this position.

A key part of my previous work involved communicating clearly with both technical and non-technical stakeholders. I handled inquiries, documented actions thoroughly, and collaborated across teams to resolve issues efficiently. I am comfortable working independently in a remote environment and have a reliable high-speed internet connection.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
