I am writing to apply for the Junior Human Resources Assistant position at Helic & Co. This role caught my attention because it requires organization, reliability, and the ability to work independently in a remote environment. I have developed these qualities through my experience managing complex software projects and coordinating across teams.

Although my professional background is in software engineering, I bring strong administrative and coordination skills that transfer well into an HR support role. In my previous work, I managed task tracking, documentation, and communication across multiple stakeholders. I am comfortable handling structured workflows, maintaining records, and ensuring that nothing slips through the cracks.

I am a quick learner who adapts easily to new tools and processes. I have worked remotely for several years and understand the importance of clear communication, self-discipline, and timely follow-through. I am confident I can contribute to the efficiency of your HR operations from day one.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills align with the needs of Helic & Co. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
