I am writing to apply for the Paralegal position with Obelisk Support, supporting a UK-based company specialising in flexible electronics. While my professional background is in software engineering, I bring strong organizational discipline, attention to detail, and a genuine interest in technology that aligns well with this role.

Through my work as a full-stack developer, I have developed the ability to manage complex workflows, track multiple moving pieces simultaneously, and maintain precise documentation. These skills translate directly to contract administration, filing, and keeping legal workflows moving efficiently.

I am comfortable working independently and taking ownership of tasks that require careful tracking and organization. My experience building systems with role-based access control and secure authentication has given me a natural appreciation for governance, compliance, and structured processes.

In addition to my technical background, I work effectively across teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can support your legal team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
