I am writing to apply for the Trade Marketing & Brand Activation Manager position at Cloetta. Your mission to bring iconic European confectionery brands to American shoppers in a locally relevant way is compelling, and I am drawn to the opportunity to help translate global brand strategy into impactful U.S. market execution.

Although my professional background is in software engineering, I have consistently operated at the intersection of technical delivery and business strategy. Over the past four years, I have led full-cycle product development projects, coordinated cross-functional teams, managed timelines, and ensured that stakeholder requirements were translated into actionable deliverables. This experience has given me strong project management, organizational, and communication skills that directly apply to managing trade marketing programs, retailer initiatives, and activation calendars.

One area that particularly interests me is the responsibility to adapt global assets for U.S. retailer and consumer needs. In my previous roles, I regularly worked with international teams to localize digital products for different markets, ensuring brand consistency while addressing regional preferences. I am comfortable managing agency partners, coordinating multiple workstreams, and delivering results in a growing business environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and execution skills can support Cloetta’s U.S. growth.

Sincerely,

Md Shahanur Islam Shagor
