I am writing to apply for the Sales Manager position at MILES Mobility. The opportunity to help build the B2B sales motion for MILES for Business 2.0, particularly in the SME segment, is exactly the kind of greenfield challenge I find most engaging.

My background is in software engineering and AI, where I have built AI-powered applications using LLMs, OpenAI APIs, and automation tools. I understand how AI-augmented sales stacks work from the inside out, including LLMs for personalization, enrichment tools, and automated workflows. This technical foundation allows me to not only use these tools effectively but also contribute to shaping and improving them as they grow.

In previous work, I have developed systems that integrate AI assistants, automate data processing, and streamline complex workflows. I am comfortable working with data pipelines, CRM-like systems, and tools that require disciplined daily use for accurate forecasting and pipeline management.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical and problem-solving skills can contribute to MILES Mobility’s growth in the SME segment.

Sincerely,

Md Shahanur Islam Shagor
