I am writing to apply for the Mitarbeiter Qualitˆtssicherung position at IfDQ Audit GmbH. Your approach of training new team members in quality management methods while valuing a genuine interest in quality standards aligns with how I prefer to work. I am looking for a role where I can grow into a new field with structured support.

My professional background is in software engineering, where I have spent over four years building and maintaining web applications. This work has required me to think carefully about processes, identify potential issues before they become problems, and ensure that every component of a system works as intended. I have developed a strong ability to analyze workflows, document requirements, and communicate technical details clearly to both technical and non-technical stakeholders.

One area that particularly interests me is the documentation and implementation of standards. In my previous work, I have created technical documentation, written clear reports, and developed systems that follow specific guidelines. I am comfortable working with structured processes and enjoy the challenge of ensuring that every detail is correct. The role at IfDQ Audit GmbH offers the opportunity to apply these skills in a new context while learning about quality management systems, audits, and certification procedures.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to learn the tools and methods your team uses and to contribute to your clients' quality improvement projects. I have attached my CV for your review and would welcome the opportunity to discuss how I can grow into this role at IfDQ Audit GmbH.

Sincerely,

Md Shahanur Islam Shagor
