I am writing to express my interest in the Steuerberater (m/w/d) position in Donauworth, as advertised by Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I bring a strong foundation in digital process optimization, secure system architecture, and data-driven problem solving that aligns well with the modern, digitally oriented working environment your partner firm offers.

Through my work as a full-stack developer, I have designed and built scalable web applications using Laravel, Next.js, React, and MySQL. I have implemented role-based access control, secure authentication systems, and real-time data processing pipelines. These experiences have given me a structured approach to handling complex workflows, maintaining data integrity, and ensuring system reliability under operational pressure.

One area that particularly interests me is the opportunity to work with digital tools and automated processes in a tax advisory context. I am comfortable with modern software stacks, cloud deployment (AWS, Docker), and database management. I believe my technical fluency can contribute to streamlining internal workflows, improving data accuracy, and supporting the firm’s digital transformation goals.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical skills and structured approach can add value to your partner firm in Donauworth.

Sincerely,

Md Shahanur Islam Shagor
